

Meet Original Software

Revolutionising the Speed & Quality of Application & Website Change

Resources, risk and application time to market are often in conflict as IT teams strive to deliver quality applications within their budgetary constraints.

Pressure is a way of life for IT development organisations. The demand from the business for new application functionality is unrelenting. At the same time, resources are limited because of the ever present need to contain costs.

For these reasons it is absolutely vital that everyone on your quality team, from designers and developers through to QA and users, have the best tools to maximise their productivity and respond to business needs quickly.

With industry leading innovation such as our code-free script building, and the ability of these scripts to change or 'heal' themselves when a change is detected in the application, means we have broken down the barriers associated with software test automation.

Original Software makes application quality available to the widest possible audience. Our rapid learning curves and reduction in the need for specialised skills go a long way in improving your return on investment.

“Original Software has turned out to be among the top five best application purchasing decisions we’ve ever made”

J.P. Jones, CIO, Macerich

Profile

Original Software offers a test automation solution focused completely on the goal of effective software quality management. By embracing the full spectrum of Application Quality Management (AQM), across a wide range of applications and environments, we partner with customers and help make software quality a business imperative. Solutions include a software quality management platform, manual testing, full test automation and test data management, all delivered with the control of business risk, cost, time and resources in mind.

Mission

It is our mission is to provide a solution suite that will enable everyone involved in the development and implementation of new or enhanced applications to participate in the software quality process.

Solutions

- > Qualify
- > TestDrive
- > TestBench
- > TrackPath

Benefits

- ✓ Reduced project cost
- ✓ Reduced project time
- ✓ Improved quality of testing
- ✓ Critical defects eliminated
- ✓ Productivity increased
- ✓ Project deadlines met

Why Choose Original Software? 10 Reasons

1. Massive ROI

The software pays for itself before the end of your first project. Every subsequent project delivers additional ROI.

2. Up and Running in Hours

Time and again, our customers say they love us because our technology doesn't require technical skills. Designed even for business people performing UAT.

3. Massive Range of Technologies Supported

From packaged applications like SAP and Oracle E-Business Suite, through web apps like Salesforce.com and e-commerce, to custom development. Windows, IBM System i, HTML web, Java, Ajax, Flex, and legacy are all supported.

4. Broad Solution

Streamline your test management, test execution, test data management, even validation of live software.

5. Methodology Agnostic

Original Software has been acclaimed by the analyst community as the best solution for supporting agile. But our customers use many other methodologies just as successfully.

6. Best of Breed for ERP

Reduce Oracle or SAP ERP testing effort by a third. Our ease of use enables business users to test upgrades effortlessly, improving productivity and speeding up time to market.

7. End-to-End Quality

Our ability to check every level of an application is unique. Manage quality at the visual layer, SOA, middleware and database.

8. Customer Support and Services

Our Support and Services teams ensure our commitment to you, that you would expect from a dedicated contact group. Darren Houghton, QA Manager, HMV said: "Original Software also has very good support – their analysts always come up with a solution. They take responsibility and seem to care about the problem."

9. Cost Effective

Competitive, flexible pricing makes it easy for you to partner with us.

10. Successful Customers and Growing

You're in great company. Hundreds of organisations around the world rely on our technology.

5 Minutes to Calculate Your Own ROI

We are confident our solution can help you deliver a high quality outcome to your application quality project while accelerating the process and optimising resources. We are also sure you can realise significant cost savings.

Based on our customers' experience, we have developed a cost-saving calculator that can quickly and clearly show you the likely cost savings and return on investment you would gain from deploying our solution. Challenge us to calculate your own ROI. [Get in touch at: origsoft.com/contact](http://origsoft.com/contact)
